SUBJECT: **SUPERINTENDENT’S PRESENTATIONS/REPORTS**

School Improvement Plans - Principals

BACKGROUND: **MES, VES, and BCHS continue to meet requirements for full state accreditation, however, division results for federal accountability – annual measurable objectives (AMOs) established by the State Board of Education as a part of the commonwealth’s NCLB flexibility waiver – were mixed:**

Millboro Elementary School – Met AMOs

Bath County High School (No Title I School) – Did not meet one or more AMOs – School Improvement Required

Valley Elementary School (Title 1 School) – Did not meet one or more AMOs – School Improvement Plan Using Indistar Required

No school was identified as a “Priority School” or “Focus School”.

For consistency, all schools are developing School Improvement Plans and using Indistar to guide and report the improvement process.

Principals will provide a summary of the steps being taken to improve student achievement and to meet annual AMOs.

VDOE Directs 485 Schools to Implement Plans to Narrow Achievement Gaps

Low-performing Schools Focus of Accountability under Virginia NCLB Waiver

The Virginia Department of Education is directing 485 schools to develop and implement improvement plans to raise the achievement of student subgroups that fell short of federal annual measurable objectives (AMOs) in reading and mathematics. The AMOs and related accountability requirements were established by the state Board of Education as part of the commonwealth’s No Child Left Behind (NCLB) flexibility waiver.

In addition, 36 schools designated as “Priority” schools must engage state-approved turnaround partners to help design and implement school-reform models meeting state and federal requirements. The NCLB flexibility program announced in September 2011 by the Obama administration requires states to designate the lowest-performing five percent of Title I and Title I-eligible schools as Priority schools. Six of Virginia’s Priority schools met all AMOs but are designated as Priority schools because they were already working with turnaround partners under the federal School Improvement Grant program.

Status	Met All Requirements*	Priority Schools*	Focus Schools	Improvement Plan Required	New Schools	Total
Number of Schools	1,241	36	72	485	8	1,836

* Six “Priority Schools” also “Met All Requirements” and are included in both column counts.

Another 72 “Focus” schools — representing 10 percent of Virginia’s Title I schools — must employ a state-approved coach to help develop, implement and monitor intervention strategies to improve student performance.

“Relief from unworkable federal mandates is welcome but there must be no retreat from the goal of closing the achievement gap,” Governor Robert F. McDonnell said. “Every student has a right to attend a school where expectations for learning are high and there is accountability for results.”

The AMOs represent the percentage of students within each demographic subgroup that must pass Standards of Learning (SOL) tests in reading and mathematics in order to make what the state board and US Department of Education define as acceptable progress toward reducing achievement gaps over six years.

“The waivers from NCLB mandates granted by the Obama administration to Virginia and other states mark a dramatic shift in federal education policy,” Superintendent of Public Instruction Patricia I. Wright said. “We are now able to target school turnaround efforts and resources on those schools where students truly are falling behind.”

The AMOs are intended as yearly progress measures for low-performing schools; higher-performing schools are expected to maintain or improve upon current pass rates. High schools must also meet a benchmark for graduation.

(more)

Starting points for the 2012-2013 accountability year are based on the actual pass rates of student subgroups in low-performing schools on the 2010-2011 SOL reading assessments and on the rigorous 2011-2012 mathematics SOL tests.

“Over the next six years, the lowest-performing students will be expected to make the greatest gains,” Board of Education President David M. Foster said. “The benchmarks are challenging but achievable and reflect the board’s firm belief that all students are capable of meeting Virginia’s rigorous standards.”

Eighteen schools must implement improvement plans solely because of achievement in mathematics and performance on the new mathematics SOL tests was a factor in 45 other schools that did not meet all AMOs.

Achievement in reading is the sole reason improvement plans are required for 393 schools, and reading was a factor in 44 schools that did not meet all requirements.

Sixty-eight percent, or 1,241 of the commonwealth’s 1,836 schools met all of the benchmarks in reading, mathematics and graduation, as did 34 of Virginia’s 132 school divisions. These divisions are:

- Accomack County
- Albemarle County
- Amelia County
- Bland County
- Chesapeake
- Colonial Beach
- Colonial Heights
- Craig County
- Essex County
- Gloucester County
- Goochland County
- Grayson County
- Halifax County
- Highland County
- King William County
- Martinsville
- Mecklenburg County
- Montgomery County
- Norton
- Orange County
- Patrick County
- Pittsylvania County
- Poquoson
- Powhatan County
- Radford
- Rappahannock County
- Richmond County
- Russell County
- Scott County
- Spotsylvania County
- Stafford County
- Surry County
- West Point
- York County

The Board of Education used actual subgroup pass rates in schools representative of the lowest-achieving as starting points in setting the objectives. The AMOs vary because subgroups performed at different levels on the 2010-2011 SOL reading tests and on the 2011-2012 mathematics SOL tests. Each annual measurable objective provides a goal for improvement for students in these schools that builds on current performance.

The board is scheduled to vote on October 25 on mathematics AMOs for assessment years 2012-2013 through 2016-2017 that culminate with all subgroups expected to achieve pass rates of at least 73 percent. Reading AMOs for assessment years 2012-2013 through 2016-2017 will be based on results from the more rigorous reading SOL tests students take for the first time this year.
