SUBJECT: SUPERINTENDENT’S REPORT – PRESENTATIONS/INFORMATION

Staff Development Survey

BACKGROUND: The instructional staff has been invited to respond to a survey to indicate staff development needs, interests, and outcomes. Responses are due Tuesday, May 7, 2013, and they will be used in planning in-service opportunities for the 2013-2014 school year.

Subject: 2013 Professional Development Survey

BCPS Instructional Staff,

As we are now into the last quarter of the 2012-13 school year, planning has begun for our 2013-14 professional development programs. According to our approved calendar for next year, there are two days set aside during preschool workdays for staff development, there is a half day of inservice in September designated for SMART goal development, there are three half-day inservice dates later in the year, and another full-day of inservice in March, in addition to other opportunities that may develop during the year. There will be both school-wide and division-wide topics for some of our staff development time, but we will also schedule workshops of interest to both small and large groups of staff. Please use this survey to communicate your needs.

There are a number of ideas and needs that have been identified already, including the following. Which of these and other topics are of interest to YOU?

- * Practical Applications of Classroom Differentiation
- * SMART Goal Development
- * Data Analysis With Excel
- * Vertical Teaming Conversations & Planning
- * Horizontal Teaming Conversations & Planning

Our professional development survey is intentionally 'general' this year--we don't want to pigeon-hole your decisions about what topics and/or types of professional development you need. Conversely, we ask that your requests be very specific. Please focus on outcomes as you respond--what is it that you want to be able to do as a result of the inservice? What should your students be able to do after your successful implementation of the program? Again, please be specific so that we are more likely to help you achieve your goals. Please group your specific ideas into one of the four areas below:

- * Classroom Content or Core Curriculum
- * Classroom Management/Behavioral
- * Technology Inservice Topics

* Other Inservice Topics

Thank you for your response by Monday, May 6, 2013.
